HAFT-ETIKETTEN ADHESIVE LABELS

Bei Bossert erhalten Sie Haft-Etiketten in einer großen Anzahl an Variationen. Die folgende Auflistung stellt einen Auszug unserer Möglichkeiten dar – bei speziellen Anforderungen an das Haft-Etikett kontaktieren Sie uns einfach!

Adhesive labels represent a very cost-efficient solution for the labelling of your products. These self-adhesive labels can be attached to virtually any product – even onto sensitive surfaces. The following list shows just a small selection of what is possible.
For special requirements please contact us!

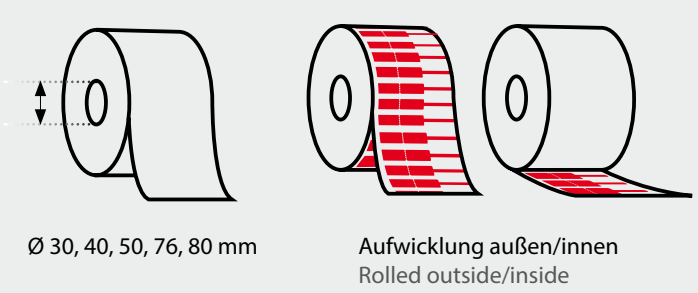

Die Rollenetiketten aus Polyethylen-Folien sind speziell für Thermotransferdrucker geeignet und unempfindlich für Ultraschallbäder. Polyethylen besitzt eine hohe Beständigkeit gegen Säuren, Laugen und weitere Chemikalien. Diese speziellen Etiketten sind selbstklebend und verfügen über leimfreie Zonen, damit keine Kleberückstände auf Ihrer Ware haften.

The computer adhesive labels made from polyethylene films are especially suitable for thermal transfer printers and insensitive to ultrasonic baths. Polyethylene is extremely resistant to acids, lyes and other chemicals. These labels are self-adhesive with glue-free zones to protect your merchandise from damage due to adhesive residue.

Aufmachung der Rolle | Roll format

Die Rollenetiketten können in der abgebildeten Aufmachung geliefert werden. Bitte geben Sie uns bei der Bestellung Ihren Drucker-Typ oder die technischen Daten an, wie Stand der Etiketten und Durchmesser der Rolle.

The computer labels can be supplied in the illustrated format. When ordering, please indicate the model of your printer or the technical specifications, such as position of the labels and diameter of the roll.
